INVENTION ONLY:

Questions/Requests:

1. Provide drawings sufficient to completely show your invention. Usually, for devices, this takes two or three drawings: (1) your invention in the context of its use (held in a hand, on a motor, etc.), (2) your invention in isolation (detailing what specifically makes it different), and (3) a drawing isolating and detailing what makes the invention really different. If your invention is software, provide the architecture, as well as high-level algorithms.
2. Referring to the drawing, part-by-part (please label the parts!), describe how your solution works.
3. Describe the functional and/or structural differences between your invention and prior solutions.
